Prot. num. 250/18 -SBR/sbr

Milan, the 31th of Aug, 2018

Object: Consultation on the draft of the security of supply scenario TENP (as of 01 August 2018) presented by the TSOs to Bundesnetzagentur as part of the national Gas NDP 2018-2028 (your ref: 8615 NDP Gas 2018-2028 Consultation NDP Gas)

Dear Sirs,

we would like to give our point of view regarding the object, as a shipper which trades natural gas in Germany and transports it throughout all the route from NCG to Gries Pass.

Pipeline TENP is a very important resource for the Italian gas market; during these long maintenance works we have had some troubles booking firm capacity on Prisma and we haven't felt safe having interruptible booked capacity in Wallbach, congestions often occur and we must always be ready for imbalances because our carrier can cut our nomination.

During the last Gas Year auction for firm capacity on Prisma (2nd July) we had to bid for days, finally we won it but with a surcharge on the top of the starting price equal to 136 cent€/kWh/h/runtime.

What happened during the last Prisma auctions clearly shows how this resource is essential for the market. The market needs the old technical available capacity at Exit Wallbach to be competitive and safe.

We thank you in advance for your kind attention and we remain at your disposal for any further information.

Best regards,

2B Energia S.p.A.
